PRECISION · HIGH-REFLECTIVITY METALS

CUT THIN SHEET AT HIGH PRECISION

Laser energy precise-control technology takes accurate control of the laser beam output, entirely based on the sheet thickness. Thin sheet is free from overburning or burr, and the cut section is much smoother.

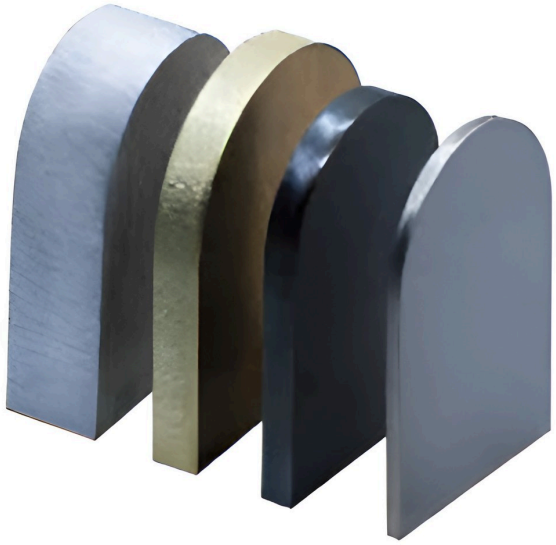

CUTS SHEET UP TO 0.787" (20 MM) THICK

ALSO DEALS WITH HIGH-REFLECTIVITY METALS

The custom-made laser generator is small, light and compactly designed. With the new generation of laser pumping source and optical elements, it has a high anti-back-reflection ability while cutting aluminum, stainless steel, copper and other high-reflectivity metals.
