MARATHON® M42

The All-Rounder for Small and Large Cross Sections

Product level 2

Hook tooth

Solid materials

Band width 13 x 0.65 - 80 x 1.6mm
Band width 1/2 x 0.025 - 3-1/8 x 0.063 Inch

Product Information

MARATHON® M42 – The All-Rounder for Small and Large Cross Sections

The MARATHON® M42 is the epitome of the economical band saw blade and stands for a broad application spectrum with consistently high quality.
The bimetal band saw blade for service-oriented customers is optimized for more complex performance and support requirements in the sawing process, such as those required for industrial applications.

The high quality features of MARATHON® M42 are now even more flexible in applications thanks to the expansion of the product line and are thus available for small cross-sections up to large solid materials.

The superfinishing of the band saw blade and the sharp cutting edges increase the blade-life and improve the quality of the cut. The fine band surface protects the machine's guides and increases fatigue strength.

Application Range

Application

- Industrial applications
- Medium-sized to large work pieces
- All metals up to 1000 N/mm² tensile strength
- Solid material
- Single, layer and bundle cutting
- Mixed operation

Advantages

- Long blade-life and high productivity due to excellent product characteristics
- Less frequent blade changes due to broad application spectrum
- Low noise levels due to highly smooth and quiet running
- Lower material allowances required due to straight cuts
- Reduced post-processing due to finer cutting surface
- Significant costs per cut savings

Features

- M42 cutting edge
- Rake angle: positive (hooktooth)
- Constant or variable tooth pitch with standard setting

- High precision in straightness and planeness of the strip

Technical Data (1/2)

Materials Overview

- Case-hardening steels, spring steels and ball-bearing steels
- Rust-proof and acid-resistant steels (ferretic)
- Nitrided steel, high-speed steel and tool steel
- Construction, deep-drawn and machining steels
- Carbon steels, and quenched and tempered steels
- Cast iron
- Aluminium / aluminium alloys
- Non-ferrous metals
